Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Objections***

1. Claims 1-4 are objected to because of the following informalities: The claim language seems to imply that the entire projector is moved in a vertical and horizontal direction wherein it appears that the projector is actually rotated about horizontal and vertical axes. It is believed that this language better describes the invention. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7-8 are indefinite because there is no antecedent for "the base". It is not possible to determine what structure the narrowing limitations apply to.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawashima et al.

Kawashima et al. discloses a device for correcting image distortion in a projector comprising:

A projector (100);

Platforms (121, 122) which allow for a user to move the projector about horizontal and vertical axes in order to correct for keystone distortion.

It would have been obvious to one skilled in the art that horizontal and vertical rotations could be made in any order the user desires.

The device may further be interpreted to comprise a top member 123 including an axis points 1232, 1231 for rotation of the projector, and a bottom member (122). Pivot holes may be deemed to be "curved channels" as best as this is described.
